

Dear Planning Board & Chairman Fontaine,

Silo Ridge has time and time again shown us that it takes its responsibility to our community seriously. The developers have taken the extra time and money to propose a plan that not only meets but exceeds environmental standards.

Silo Ridge doesn't just meet required Stormwater Pollution Prevention Plans standards, it exceeds East of Hudson standards on stormwater. Silo Ridge also surpasses all Natural Resource Management Plan standards, including water quality buffers – making sure we protect local bodies of water. Though stormwater and drainage are not often considered by the masses, both are hugely important during any development and Silo Ridge has done its due diligence in this space.

I stand behind Silo Ridge and suggest the Board move forward with this process.

Sincerely,

PO Box 212
